

# Bristol MRI Course 2012

## Course Programme

Our third Bristol MRI Course has been designed to be a perfect revision tool for SRTs and all students of MR. For District Hospital Radiologists, it provides a great review of applications already learnt plus an opportunity to learn new techniques and protocols. Literally you can leave this course able to "do it".

Each day covers a different area of the body and each presentation covers an overview of the sequences, the anatomy based on pictures, uses of that sequence and the whys and wherefores.

**You can attend one day or the week and special rates are given for the weeks attendance.**

• Below is the initial planned programme. For latest updates and Speakers please check the website, major updates will also be emailed •
