

# The British MRI Course 2014

The Hilton, Auckland, New Zealand

**25.25 RANZCR CPD points can be claimed for attendance at  
The British MRI Course**

The Royal Australian and New Zealand College of Radiologists

Following our very successful MRI course that has run in the UK for the last six years we are delighted to bring this course to New Zealand.

Led by renown experts in their fields, each day covers a different area of the body and each presentation covers an overview of the sequences, the anatomy based on pictures, uses of that sequence and the whys and wherefores.

You can attend one day or the week, special rates are given for the weeks attendance.
